------------	--	---------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Description:** If a vehicle is driven with the primary hood latch disengaged, (and the hood partially opened), the secondary hood latch may become contaminated with dirt or corrosion. If the secondary hood latch is not properly inspected and maintained, such dirt or corrosion could then prevent the secondary hood latch from engaging properly.

If your vehicle is driven with the primary hood latch disengaged (and the hood partially opened), the secondary hood latch on your vehicle may become contaminated with dirt or corrosion. Such dirt or corrosion could then prevent the secondary hood latch from engaging properly. If the primary hood latch is later inadvertently released (such as when refueling the vehicle) and the secondary hood latch, after having been opened, remains stuck in the open position, the hood may open without warning while driving and could obscure the driver's vision, increasing the risk of a crash.

**Remedy:** A remedy is now available. Dealers will inspect the latch for proper operation, and clean and lube as needed, or replace the secondary latch if it is not fully functional, at no cost to the owner. In addition, dealers will now install a new hood release lever spring and affix an under-hood latch-maintenance warning label to any vehicles affected by this voluntary safety recall campaign. An Owner's Manual addendum card with instructions on how to lubricate and maintain the secondary hood latch will also be mailed together with the customer notification. The repair should take less than one (1) hour to complete. The dealer may require the vehicle for a longer period of time based upon the dealer's work schedule.

## Glossary

### First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

### Lease

When someone leases a car from a dealer, the dealer actually sells the vehicle to a leasing company. The leasing company then collects payments for the vehicle from the new owner for 24, 36, 48 or more months. A leasing company can be an independent car dealer or a car manufacturer.

### Manufacturer Recall

Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

### New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

### Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

### Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
