Massage Therapy and Spa Services

SWEDISH MASSAGE

Most common type of massage that combines gliding, kneading and friction techniques that relieves muscular tension and improves circulation.

DEEP TISSUE

Similar to Swedish massage, but the deeper pressure is beneficial in releasing chronic muscle tension. The focus is on the deepest layers of muscle tissue, tendons and fascia (the protective layer surrounding muscles, bones & joints).

SPORTS MASSAGE

Focused on stretching, pressure point, rebalancing, muscle and joint release. Performed pre-event, during or post-event on athletes or active individuals.

LOMI LOMI MASSAGE

The customary massage of Hawaii that cleanses, nurtures, invigorates and soothes. This type of massage uses long, flowing strokes and medium-to-deep pressure.

PRENATAL MASSAGE

Specially designed for the mother-to-be. This nurturing massage is the perfect way to reduce stress and relieve discomforts during pregnancy. Please contact physician prior to scheduling a prenatal massage. Massage not recommended during first trimester (less than 12 weeks). 60 and 90 minutes only.
